

OBIEE11g and Essbase Integration

2 Day Course

Course Description

- The goals of the *OBIEE11g & Essbase Integration* course are:
 - Become familiar with the main concepts of both systems involved
 - Acquire the necessary knowledge for the configuration and development of a system that harvests Essbase as a data source for OBIEE11g
 - Develop skills to support customizations on integration architectures

Target Audience

- Technical BI Consultants
- BI Developers
- Essbase Developers
- Project Managers

Topics Covered

- Multidimensional modeling concepts
- Essbase overview, architecture, key features
- OBIEE11g architecture overview, repository and user interface basics, security
- Using Essbase as a data source
- Importing an Essbase cube into the OBI repository
- Exploring the multidimensional schema in the Physical layer
- Converting the Measures dimension to flat measures
- Verifying the connection to the Essbase data source
- Creating the Business Model
- Creating an analysis based on the new sources

Pre-requisites

- Basic understanding of Dimensional Modeling concepts
- OBIEE10g/11g basic repository modeling, security setup, reports creation knowledge
- Essbase basic working knowledge

Languages

- *This course is offered in English and Spanish (training material is only available in English).*
